

MAHLE Service Solutions Offers TechPRO® VDS Combo Kit for Light and Commercial Vehicle Diagnostics

FARMINGTON HILLS, Mich. – August 29, 2017 – MAHLE Service Solutions has introduced its TechPRO® Diagnostic Systems VDS Combo Kit. The new kit includes components to diagnose and repair both light and commercial vehicles and is ideal for mixed fleets and municipalities who service a variety of vehicle sizes.

Earlier this year at Heavy Duty Aftermarket Week (HDAW), MAHLE Service Solutions announced its collaboration with Noregon to introduce a new in-shop diagnostic and repair solution for commercial vehicles. The TechPRO® Commercial Diagnostic System (VDS1000HD) from MAHLE Service Solutions, powered by JPRO®, provides the heavy duty market with the ability to analyze, diagnose and repair commercial vehicles.

The VDS1000HD provides more than 54,000 heavy and medium-duty fault codes with detailed OEM level component and trailer descriptions. The easy-to-use design allows users to view and print log files, obtain fault management information, store and save data, and review total vehicle health status.

“Competitive scan tools for commercial vehicles require you to point, click and tell the machine what type of vehicle and system you are connecting to,” explained Andreas Huber, general manager, MAHLE Service Solutions. “The TechPRO® VDS1000HD automatically detects all the components that are custom installed in a commercial vehicle which greatly simplifies the repair process so technicians do not have to take additional time to find this information.”

The VCI1000HD adapter is fully RP1210c and J1939 type 2 compliant; making it simple for technicians to connect with other

OE diagnostic software systems. In addition, the VDS1000HD offers expansive bi-directional testing capabilities such as manual DPF regens, cylinder cutout tests and idle shutdown enable/disable – at an affordable price point.

The VDS1000HD can also run diagnostics on the after-treatment system, including easy-to-understand graph interpretations, and checklists to aid technicians throughout the diagnostic process.

MAHLE Service Solutions previously introduced its TechPRO Automotive Diagnostic System (VDS1000) to the automotive aftermarket, a versatile, software-based tool that helps analyze, diagnose and repair light vehicles to maximize technician productivity. TechPRO VDS1000 can decode a vehicle identification number (VIN) in seconds with one click. A scan of vehicle wide diagnostic trouble codes (DTC) on all modules takes 30 seconds or less with the Bluetooth-enabled vehicle communication interface (VCI).

A one-year subscription for the VDS Combo Kit allows users to activate and use both the VDS1000 and VDS1000HD diagnostic software and includes regular software updates.

About MAHLE

MAHLE is a leading international development partner and supplier to the automotive industry. With its products for combustion engines and their peripherals as well as solutions for electric vehicles, the group addresses all the crucial issues related to the powertrain and air conditioning technology—from engine systems and components to filtration to thermal management. In 2016, the group generated sales of approximately EUR 12.3 billion (USD 12.9 billion) with around 77,000 employees and is represented in 34 countries with over 170 production locations.

About MAHLE Aftermarket

MAHLE Aftermarket, the business unit specializing in spare parts, uses the expertise from the series production of original equipment in its automotive aftermarket product range, and supplies trade, repair shop and engine repair partners. MAHLE Aftermarket is represented at 22 locations and other sales offices worldwide, with 1,555 employees. In 2016, the business unit achieved a global sales volume of EUR 899 million (USD 946 million).

About MAHLE Service Solutions

MAHLE Aftermarket Inc., Service Solutions division specializes in the development, manufacturing and distribution of automotive services, tools and maintenance equipment, including vehicle diagnostics, air conditioning service, fluid exchange and nitrogen tire inflation systems. Formerly known as RTI Technologies, MAHLE Service Solutions continues its legacy of building shop equipment for the most stringent OEM and aftermarket needs. Along with this expertise, MAHLE Service Solutions combines the know-how of MAHLE Behr with automotive thermal management and MAHLE Powertrain with automotive test systems. Each of these three entities have more than 25 years of R&D and
