A/C service season is here: MAHLE supports workshops

- MAHLE offers workshops a free thermal package with support and marketing materials in Germany
- Available from wholesalers or directly from MAHLE

Spring heralds the start of the A/C service season. Accordingly, MAHLE Aftermarket is offering workshops all across Germany a variety of proven and new support materials in the form of a free thermal package via participating wholesalers and a dedicated online platform. The package makes it easy to convince customers of the need for an air conditioning check or service by highlighting the benefits for their safety, health, and wallet.

The free thermal package contains around 15 different materials, including flyers, posters, and service stickers and booklets, all designed to help workshops market their air conditioning maintenance offering. An info brochure on replacing the air conditioning compressor and flushing the air conditioning system provides useful insights and tips with regard to repair. There is also a booklet with information on the correct filling quantities for refrigerant and air conditioning compressor oil as well as checklists for the A/C service. And MAHLE has a separate brochure on thermal management for electric and hybrid vehicles. This attaches particular importance to the A/C service, as the air conditioning system is also responsible for cooling the power electronics and battery and has therefore been transformed from a comfort feature to a component that ensures reliable operation. No matter the drive, a properly maintained air conditioning system increases safety, prevents mold spores in the air flow

and cabin, and avoids damage to the individual components of the air conditioning system.

The free thermal package can be obtained from participating wholesalers and online at bit.ly/THERMO-PAKET

About MAHLE

MAHLE is a leading international development partner and supplier to the automotive industry as well as a pioneer for the mobility of the future. The group's product portfolio addresses all the crucial issues relating to the powertrain and air conditioning technology—both for drives with combustion engines and for e-mobility. In 2019, the group generated sales of approximately EUR 12.0 billion with more than 77,000 employees and is represented in more than 30 countries with 160 production sites.

About MAHLE Aftermarket

MAHLE Aftermarket, the business unit specializing in spare parts, uses the expertise from the series production of original equipment in its automotive aftermarket product range and supplies trade, workshop, and engine repair partners. The portfolio also includes products developed by MAHLE Service Solutions for workshop equipment as well as comprehensive services and customized training programs.

MAHLE Aftermarket is represented at 25 locations and other sales offices worldwide, with around 1,700 employees. In 2019, the business unit achieved a global sales volume of approximately EUR 950 million.
