

## Service Jack Rods

The service jack rod is a compact, innovative tool designed to enhance the safety and versatility of traditional floor jacks. By securely locking into place at adjustable heights, it transforms a standard jack into a stable support system, eliminating the need for bulky jack stands. With models ranging from the Standard to the XL and heavy-duty options like the dual lever, users can choose the right fit for everything from general automotive maintenance to commercial-grade repairs.

What sets these service jack rods apart are the patented design and user-friendly features. The dual lever model, for example, allows for quick, pin-free locking—ideal for fast-paced environments like workshops or mobile service while the XL version accommodates taller vehicles. Whether you're a professional mechanic or a DIY enthusiast, these service jack rods offer a safer, more efficient way to work under vehicles without compromising on space or stability.

### Service Jack Rod Features:

- Eliminates the need for bulky jack stands
- Secure locking mechanism locks into place at your desired height, even if the service jack fails
- Attaches to a service jack using the optional jack rod mount
  - ✦ Jack rod mount (485 80195 00)
  - ✦ Jack rod XL mount (485 80197 00)
- High load capacity
- Adjustable height
- Patent-protected design
- Ideal for workshops and mobile service

## Specifications

Feature	SJR-S (Standard)	SJR-DL (Dual lever)	SJR-XL (Extra long)
Part number	485 80196 00	485 80190 00	485 80189 00
Height range	8 - 14 in (20.3 - 35.5 cm)	8 - 14 in (20.3 - 35.5 cm)	14 - 24 in (35.5 - 60.9 cm)
Load capacity	2 ton (3.5 ton with cross pin)	3.5 tons	2 ton (3.5 ton with cross pin)
Locking mechanism	Manual locking pin	Dual lever (no pin needed)	Manual locking pin
Application	General automotive use	Commercial / fast paced use	Taller vehicles or lifted cars
