

## MAHLE ACX2xxx\* Unit Software Update Instructions

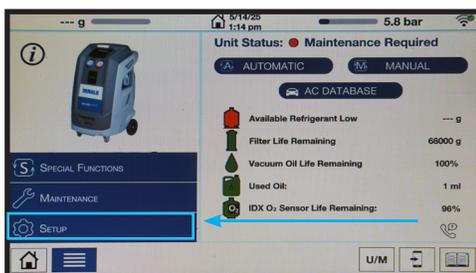

Please follow these instructions to update the software on your ACX2xxx\* unit. This update includes a multi-part software installation. The entire update process itself takes up to 30 minutes, but can take longer depending on how quickly the steps are completed.

If you have any questions or concerns regarding this software update, please contact your service provider or MAHLE technical support at 800-468-2321 or tech.mss@mahle.com.

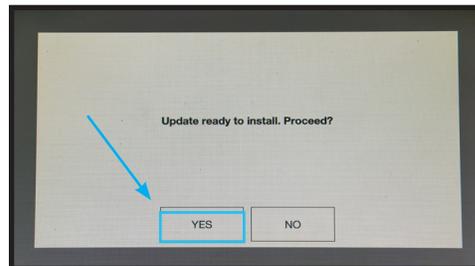

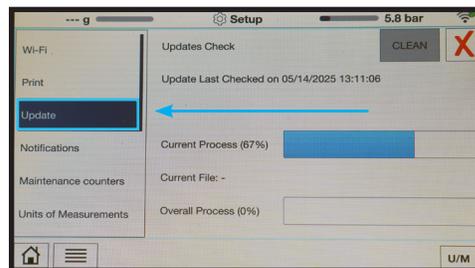

**STEP 1:** The unit should indicate the software is the “outdated version” (VER: 1.131.73.1). It may also show “latest version” (VER: 1.131.73.1)

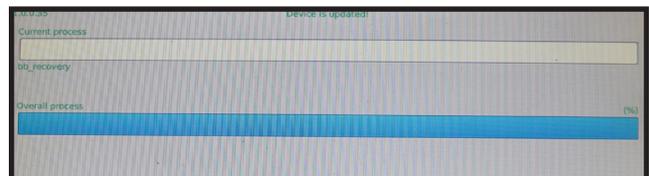

**STEP 2:** Press the menu icon (☰) choose setup.

**STEP 3:** Press "Update" and when asked to proceed, press "YES".

Once the progress bar is complete, proceed to **STEP 4**.

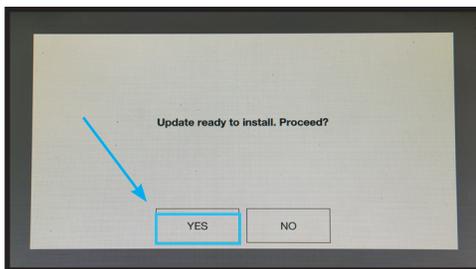

\*ACX2xxx models are: 2150, 2180/2180H, 2250 and 2280.

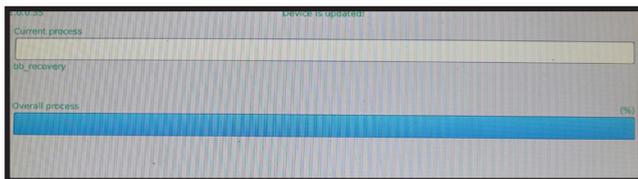

At this point the home screen will show "1.25.03.24 downloading software" highlighted. Wait until download is complete (as shown in RED "Downloading Sw."). This process may take up to 5 minutes – DO NOT TURN OFF MACHINE.

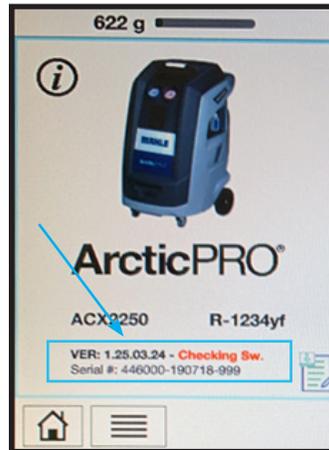

**STEP 4:** When the software download is complete, press "YES" to install the update.

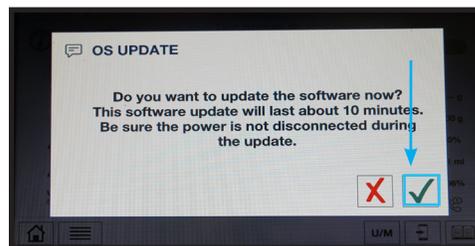

Once the progress bar is complete, proceed to **STEP 5**.

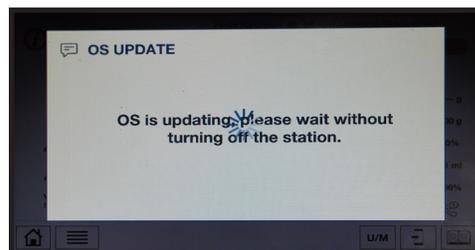

After the 2nd software installation, the machine will restart and the home screen will indicate the unit is checking the software (as shown in RED "Checking Sw.")

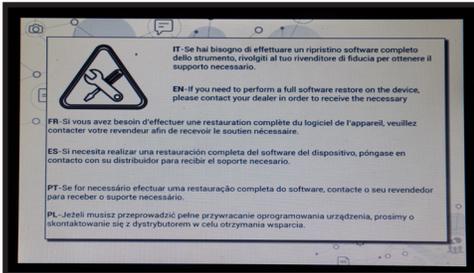

**STEP 5:** To confirm to install the 2nd software version on this update, select the green checkmark. This process may take up to 10 minutes – DO NOT TURN OFF MACHINE.

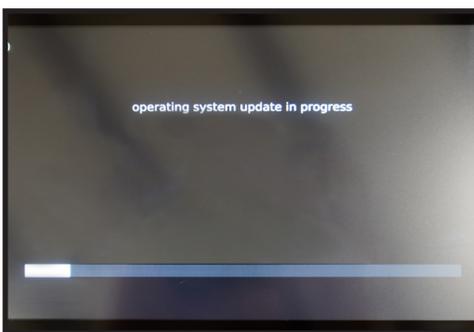

This update screen may last up to 2 minutes.

The following screen will quickly pop up, advising you to contact your dealer only *if you require a full software restore*.

This screen indicates the final update is in progress. This update can take up to 3 minutes.

The operating system on the unit will automatically reboot when the installation is complete. The reboot process may take up to 10 minutes.

After reboot, there will be confirmation that the software has been updated to VER: 2.25.05.05 (as indicated in GREEN "Latest version").

It is important to check that the time is displaying correctly on the unit; there is a possibility that the time zone might be altered during the software update process.
